

HydroTherapy

Case studies

Case 1: Patient, female, 79 years old

Description of the wound: 3.5 cm wide Ulcus cruris venosum above left ankle joint, previous wound treatment: for the last four weeks with Betaisodona

1. 15.05.14
Start with HydroTherapy:
HydroClean® plus, 4 cm, round,
accompanying compression therapy

2. 22.05.14
Continuation of treatment with
HydroClean® plus. Change on
05.06. to HydroTac®, since majority
of the wound had granulated.

3. 16.06.14
Wound closed up
